

National Institute for
AUTOMOTIVE SERVICE EXCELLENCE

ASE's Work Experience Requirement

Note: You should submit the ASE Work Experience Report *after* you have registered to test.

To become ASE certified, you must pass an ASE test and have at least two years of relevant hands-on working experience.

To document your work experience, please complete both pages of the ASE Work Experience Report. Ask your supervisor or employer to verify the length of your employment, job details, and sign the report. Then sign the form yourself, and mail it to:

ASE
PO Box 4007
Iowa City, IA 52243

You may claim experience in one or more of the following areas:

- Repair Technician
- Parts Specialist
- Collision Damage Estimator
- Service Consultant

Please note that work experience as a repair technician does not satisfy the separate experience requirement for parts specialist, collision damage estimator, or service consultant.

You may receive credit for up to one year of the two-year work experience requirement by substituting relevant formal training. Details for this option are given on the following page.

You can still take ASE tests if you do not have the required experience. You will receive a score report, but you will not earn certification or receive a certificate until you fulfill the experience requirement. Please save the form until you have the required experience, then complete and return it.

If you have any questions, contact the ASE Help Desk at 1-800-388-5584, 8 am to 5 pm Central time, Monday through Friday, or send an email with your full name, city, state, and daytime telephone number to asehelp@act.org.

Substitutions for Work Experience

Technicians: You may receive credit for up to one year of the two-year work experience requirement by substituting relevant formal training in one, or a combination of the following:

High School Training: Two full years of training, in either automotive mechanical or collision repair, may be substituted for one year of work experience.

Post-High School Training: Two full years of post-high school training in a public or private trade school, technical institute, community college, or four-year college, or in an apprenticeship program may be counted as one year of work experience.

Short Courses: For shorter periods of post-high school training or continuing education, you may substitute two months of full-time training for one month of work experience.

You may receive full credit for the two-year work experience requirement with the following:

Completion of Apprenticeship: Satisfactory completion of either a three- or four-year bona fide apprenticeship program.

Completion of an OEM-Sponsored Co-op Program: Satisfactory completion of a post-secondary factory sponsored training program that results in a two-year associates degree or equivalent, such as GM ASEP, Ford ASSET, Toyota T-TEN, Honda PACT, or Chrysler CAP; plus adequate hands-on experience obtained during the co-op program.

To have your training considered as a substitute for work experience, complete the enclosed work experience report and return it to ASE with an official transcript of courses, or a statement of training, or a certificate showing satisfactory completion of apprenticeship. Documents must show the length of training (hours or weeks).

Parts Specialists: The guidelines above also apply, but credit will only be given for training related to automotive or truck parts. No credit will be given for mechanical repair or collision repair training. Also, experience as a repair technician does not satisfy the experience requirement for parts specialist certification.

Collision Damage Estimators: The guidelines above also apply, but credit will only be given for training related to damage analysis/estimating. No credit will be given for mechanical or collision repair training. Also, experience as a repair technician does not satisfy the experience requirement for collision damage estimator certification.

Service Consultants: The guidelines above also apply, but credit will only be given for training related to service consulting. No credit will be given for mechanical or collision repair training. Also, experience as a repair technician does not satisfy the experience requirement for service consultant certification.

Canadian Technicians: A valid provincial automotive trade certificate is acceptable evidence of sufficient work experience. Include a copy of your provincial license with your completed report form.

The Institute reserves the right to evaluate all requests for substitution of training for experience and to grant such credit as may be appropriate. Work experience other than that described above may also be credited toward fulfillment of the two-year experience requirement where, in the Institute's judgment, the nature of the experience so warrants.

If you have questions about the work experience requirement or training substitutions, call the ASE Help Desk at 1-800-388-5584, 8 am to 5 pm Central time, Monday - Friday, or email asehelp@act.org.

ASE Work Experience Report

Your Name (please print) _____

_____-_____-_____
Your Social Security Number / Canadian SIN / ASE ID Number

4. Work experience detail: Check the box(es) to indicate the types of automotive service in which you have experience, and indicate the total number of years you have worked in each field. Include only work experience gained while employed, not classroom or training lab experience. **Check ALL boxes that apply to you.**

Automobile Technician

- Gasoline Engine Repair
- Diesel Engine Repair
- CNG / Alternate Fuels
- Hybrid Systems
- Driveability & Emissions
- Automatic Transmissions
- Manual Transmissions
- Driveshafts & Axles
- Suspension & Steering
- Hydraulic Brakes
- Battery/Starting/Charging
- Electrical Accessories
- Heating & A/C
- Exhaust Systems

Total years of work in this field _____

Med/Hvy Truck, School Bus, or Transit Bus Technician

- Gasoline Engine Repair
- Diesel Engine Repair
- CNG Engine Repair
- Hybrid Systems
- Driveability & Emissions
- Automatic Transmissions
- Manual Transmissions
