

Entry-Level Certification Program

Proctor Quick Start Guide

Proctors

The proctor is responsible for verifying the student's identity, unlocking the scheduled test, and monitoring the student's test session to ensure all testing procedures are followed. Note: Remote proctoring is supported by the testing platform. Remote proctoring requires audio and video equipped PCs (webcam, microphone, and speakers/headphones) along with a video conferencing service. Refer to the Remote Proctoring section later in this manual for more information.

Locating a Student on the Proctor List

The proctor's screen shows all tests that are currently assigned for all students. Since the list shows a separate record for each test by student, the proctor should use one or more of the filters and sorting tools to manage the list and quickly locate the specific test(s) they wish to unlock.

Filter and sorting tools include:

1. Filter by first and/or last name.
2. Filter by test series (Automobile, Collision, Truck), and/or by test name.
3. Change the number of records displayed per page (e.g., 0, 25, 50, etc.)
4. Hide tests that have been completed.
5. Sort A-Z or Z-A by any selectable column header.

Once a filter is populated (e.g., with a name, test series and test for example), click the "Search" button to update the screen.

The screenshot shows the 'Proctor Remotely' interface. At the top, there is a 'Search Students' section with input fields for 'First Name' and 'Last Name' (both marked with a red circle and the number 1), a 'Series' dropdown menu (marked with a red circle and the number 2), and a 'Test' dropdown menu (marked with a red circle and the number 3). There is also a 'Students Per Page' dropdown menu set to '10' (marked with a red circle and the number 3). A 'Search' button and a 'Show All Students' button are located to the right. Below the search section is a checkbox labeled 'HIDE COMPLETED TESTS' (marked with a red circle and the number 4). The main area is a table with columns: First Name, Last Name, UserName, Student Status, Roster Key, Series, Test Name, Test Status, Date/Time Unlocked, Date/Time Test Started, and Date/Time Test Completed. The table contains six rows of data. A purple button labeled 'Proctor Remotely' is located above the table, with a red circle and the number 5 pointing to it. The page number 'Page: 1 of 1' is displayed at the bottom.

Unlocking a Test for a Student

To launch a test for a student, the proctor should take the following steps:

1. Verify the student's identity.
2. Confirm that the student has his/her username and password.
3. Confirm which test the instructor wants the student to take and click the "Unlock Test" button for it.
4. Direct the student to login via the "Student Login" at www.ASE.com/Entry-level and start their test.
5. Monitor the student throughout the testing session to ensure he/she does not receive assistance or open other programs or windows during the test session.
6. If a student is scheduled to take more than one test, they should notify the proctor when they have completed the first test so the proctor can unlock the next one.

Please unlock only one test at a time per student. Once a test is unlocked, the student has 30 minutes to launch the test. If the student does not begin the test within the 30-minute period, the system will reset the test to the "Assigned" state.

Page: 1 of 1 << >>

If a student cannot remember their password, the Proctor can reset their password to a default "na3sa1" by clicking the "Reset PW" button (provided they have completed their profile as indicated by the word "Registered" in the Student Status column). If the Student Status is "Unregistered", the Proctor can provide the student with their Roster Key and First and Last Name as displayed on the list.

Student CarryB - Password changed to na3sa1

Page: 1 of 1

By periodically refreshing their screen (use F5 key), the Proctor screen will be updated to reflect Test Status, Date/Time Test Started, and Date/Time Test Completed.

Pausing and Restarting a Test

Should the proctor have a need to pause a student's test for whatever reason, they may manually pause the test by clicking the pause button that appears on the same row as the student name and test title. This action locks the test, and the student cannot continue in the exam until allowed to do so by the proctor.

Under some conditions, it is possible the system may automatically pause a test. Reasons for an automatic pause may include: the student experiences a technical interruption during their test (e.g., loss of Internet, computer failure, etc.), or the student leaves the screen and attempts to access other resources or webpages on their computer during the test session. This automatic pause allows the proctor the opportunity to investigate possible causes for the pause.

Once a test is paused, the pause button is replaced by a restart button. Click on the restart button to unlock the test, allowing the student to continue the test from where they left off. Same day restarts allow full navigation throughout the test. Subsequent day restarts will only allow the student to view questions not seen previously.

REMOTE PROCTORING INSTRUCTIONS FOR ASE ENTRY-LEVEL CERTIFICATION TESTING

ASE recommends that you remotely proctor no more than six students in a session. Each student's progress in the test session is monitored by you and the testing system.

Before starting the test session, verify the student's video feed to your dashboard, the student's identity, and that the student's environment is reasonably secure. Once verified, please read these instructions to your students:

"Once you begin a test, you should proceed all the way through it without clicking on any other programs or entering any keyboard keystrokes. If you access any other program or functions on your computer during the test session, for any reason, your test may be paused and/or terminated without further warning."

You may pause a student's test session if you suspect any cheating or observe other irregularities. The test delivery system also monitors each student's progress and will automatically pause the test if they click on anything outside the test window or use any keyboard function that does not apply to the test. If the student clicks anything outside the test window, or uses the keyboard repeatedly, the system may automatically pause that test session. You then have the option to resume (restart) the test session, if you determine the student's actions did not involve cheating. If you do not resume the test session, it will be terminated for that student.

If you lose live video from the student, please pause the test session until video can be reestablished. If video cannot be reestablished, discontinue the test and reschedule for a later time. You may need to contact the ASE Entry-Level help desk to enable a restart of the student's test.

Remote Proctoring

Remote Proctoring is a remote video and audio monitoring of student testing using a video conferencing service. The proctor may use any video conferencing product they currently use (ZOOM, Microsoft Teams, Go-to-meeting, or free one). Both the proctor and the students will need to have a webcam and microphone connected to the PC and allow the use of their microphone and camera under computer settings.

The conferencing software should be launched before starting the remote proctor session. You will need the web address or link for the video conference session/meeting. For more information on how to keep test takers and staff safe using videoconferencing reference click here: <https://www.edweek.org/media/video-conference-safety.pdf>

To begin a remote proctoring session, click on the Proctor Remotely button on the Proctor Dashboard.

Remote Proctoring Session

Proctor Quick Start Guide

ZOOM CONFERENCE LINK

Students will be instructed to open the conference link when launching the exam.

CONFERENCE INSTRUCTIONS

Instructions will be displayed to students when launching the exam.

Paste in the video conference session/meeting web address/link here.

Input any customized instructions for the students to be aware of before they launch the video conference

The proctor can use any video conferencing software. Be sure to start the video conference session/meeting first, then copy and paste the link in the Conference Link Field. This will be used to launch the video conference for the students. Make sure you paste the entire link with https:// at the beginning. The Conference Instructions field allows the proctor to provide customized instructions that will be displayed on the student video conference launch screen. This could include information needed to verify identity and other test session directions.

Remote Session Instructions

Click the button below to open a new window with a remote proctoring session lead by your proctor. Then return to this window and you will see a "Start" button appear when your proctor has unlocked the exam.

Type instructions to verify students identity and other directions here.

Conference instructions for the students entered by the proctor will be displayed here on the student Remote Session Instructions window

Launch Conference

Waiting for exam to begin...

The proctor selects the students for the remote session by clicking on the checkbox by their name. All students can be selected by clicking the checkbox at the top.

ASE recommends that you remotely proctor no more than six students in a session. Each student's progress in the test session is monitored by you and the testing system.

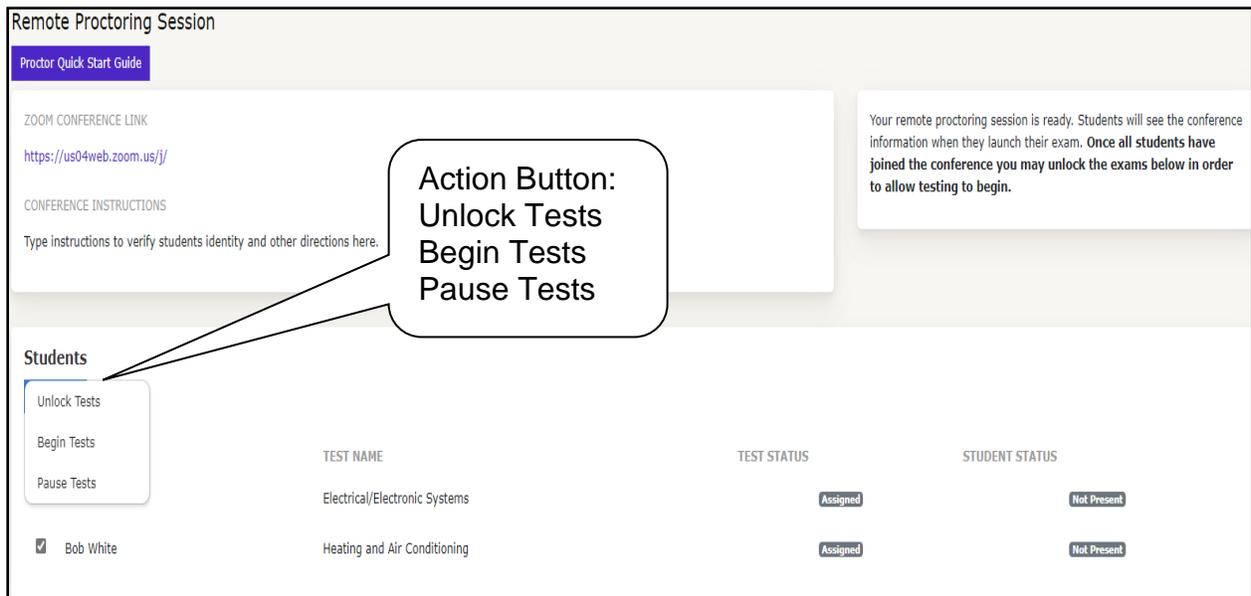

The screenshot shows the 'Select Students' interface. It features a table with columns for 'STUDENT NAME', 'TEST NAME', and 'ROSTER KEY'. A 'Begin Session' button is located at the bottom left. Two callout boxes provide instructions: one pointing to the checkboxes in the 'STUDENT NAME' column and another pointing to the 'Begin Session' button.

STUDENT NAME	TEST NAME	ROSTER KEY
<input checked="" type="checkbox"/> Chad Moore	Electrical/Electronic Systems	9KK-EW3
<input type="checkbox"/> Bob White	Electronic Systems	WCD-PQT
<input type="checkbox"/> Chad Moore	Electronic Systems	9KK-EW3
<input type="checkbox"/> Bob White	Engine Performance	WCD-PQT
<input type="checkbox"/> Chad Moore	Engine Repair	9KK-EW3
<input type="checkbox"/> Bob White	Engine Repair	WCD-PQT
<input type="checkbox"/> Chad Moore		9KK-EW3
<input checked="" type="checkbox"/> Bob White		WCD-PQT

Once the session information is complete and the students are selected, click the Begin Session button. Once the session begins the screen is updated to show the progress of each student. If the student, you selected already has an instance of the test in progress that information will be displayed. A new student will have a test status of Assigned and student status of Not Present:

The screenshot shows the 'Remote Proctoring Session' interface. It includes a 'Proctor Quick Start Guide' button, a 'ZOOM CONFERENCE LINK' field with a URL, and a 'CONFERENCE INSTRUCTIONS' field. A message box states: 'Your remote proctoring session is ready. Students will see the conference information when they launch their exam. Once all students have joined the conference you may unlock the exams below in order to allow testing to begin.' Below this is a 'Students' section with an 'Actions' dropdown and a table showing student progress.

STUDENT NAME	TEST NAME	TEST STATUS	STUDENT STATUS
<input checked="" type="checkbox"/> Chad Moore	Electrical/Electronic Systems	Assigned	Not Present
<input checked="" type="checkbox"/> Bob White	Heating and Air Conditioning	Assigned	Not Present

The first action is to Unlock Tests. This puts the Launch Test button on the student dashboard and gives the student the ability to join the proctor video conference, by clicking on the launch conference button on the students Remote Session Instructions window.

As the students join the video conference session, verify the student's video feed to your dashboard, the student's identity, and that the student's environment is reasonably secure. Once everyone is present and has been verified, please read these instructions to your students:

"Once you begin a test, you should proceed all the way through it without clicking on any other programs or entering any keyboard keystrokes. If you access any other program or functions on your computer during the test session, for any reason, your test may be paused and/or terminated without further warning."

The next action is to Begin Tests. This puts the Begin Exam button on the students Remote Session Instructions window and allows the student to begin the test. A warning is displayed to the student that if they leave the testing window they will be flagged for cheating. Once the testing session has begun the proctor session window updates with the status of each tester, while the proctor continues to monitor the testers in the video conferencing software.

Assigned	Student has been assigned test.	Not Present	Student has not joined the remote proctoring session
Idle	No activity from student for a few minutes	Unlocked	Student test session unlocked, able to join the remote proctoring session
Ready	Student has joined the remote proctoring session	In Progress	Student has begun the test
Paused	Test is paused by system or proctor	Complete	Student has completed test

You may pause a student's test session if you suspect any cheating or observe other irregularities by selecting the student and clicking on the Pause Tests action button. The test delivery system also monitors each student's progress and will automatically pause the test if they click on anything outside the test window, including the video conferencing window, or use any keyboard function that does not apply to the test. If the student clicks anything outside the test window, or uses the keyboard repeatedly, the system may automatically pause that test session. The student will get a message that they must see the proctor to continue. You then have the option to resume (restart) the test session if you determine the student's actions did not involve any testing irregularities.

To restart the test after pausing the proctor needs to unlock the test again, the student logs back in and clicks launch test to reenter the video conference. The proctor will then need to select the student's test and choose the "Begin Tests" action again. The student can click the "Begin Test" button to resume the test wherever the disconnect/pause happened.

If you lose live video from the student, please pause the test session until video can be reestablished. If video cannot be reestablished, discontinue the test, and reschedule for a later time. You may need to contact the ASE Entry-Level help desk to enable a restart of the student's test.

If you leave the session screen, you can start a new session using the same video conference and students. The status of in progress tests will display, like the screenshot above.

Remote proctors should monitor students throughout the testing session to ensure cheating is not occurring. If the student leaves the test window for any reason before submitting their test, their test could be flagged.

Helpful Hints

- **Time To Start** – Students have 30 minutes to start the test once it is unlocked by the proctor. If the student does not begin the test within 30 minutes, the Proctor will need to unlock the exam again.
- **Time To Test** – Sixty minutes is the recommended testing time for all tests except the Automobile Maintenance and Light Repair (MR), Automobile Service Technology (AS), and the Truck Inspection, Maintenance and Minor Repair (IM). These tests should be scheduled for 90 minutes. For those students requiring additional time, the system clock will automatically allow twice the recommended time (i.e. 120 – 180 minutes).
- **Monitor Students** – Students must be monitored by the proctor throughout the entire test session to ensure that no outside assistance is utilized – including the opening of additional browser windows.
- **Restarts** – If a student experiences a technical interruption during their test (e.g., loss of Internet connection, computer failure, etc.), the proctor can reauthorize student test login and allow the student to pick up where they left off after an elapsed time of 5 minutes. Same day restarts allow full navigation throughout the test. Subsequent day restarts will only allow the student to view questions not seen previously.
- **Student Profile/Password** – If a student has not previously set up their student profile (i.e., established a username and password), they must do so prior to starting the test. To do this, they will enter their first name, last name, and their unique Roster Key in the lower half of the student login screen. If necessary, the proctor can locate the student's Roster Key next to their name on the proctor screen.
- **Test Fails To Start** – If the student is kicked out of the system as they try to launch the test, verify that the pop-up blocker is turned off.
- **ASE Entry-level Certification Help Desk** - 1-800-362-0544 – 8:30 am to 5 pm Monday-Friday, or Entry-Level@ase.com.
